

TURNBERRY SOLUTIONS

Splunk Enterprise Security
Amazon Web Services

ADVANCED SECURITY ANALYTICS, INTELLIGENCE AND PROACTIVE DEFENSE.

Is your organization hacked right now? Are you 100% sure? How mature is your security posture? Reactive? Proactive? No-active?!! Let us help. Outsource or co-source your cybersecurity with confidence. We will completely manage or integrate with your security team to protect you from the bad guys.

As a Splunk Premier Partner and an Amazon Web Services Advanced Consulting Partner, Turnberry Solutions specializes in Digital Intelligence with expert practices around Cloud Computing, Big Data, and Information Security proven to meet the most rigorous business needs.

Recognizing the current security threat landscape and our unique ability to architect and build the converged technology, we have created a turn-key managed security platform. We have combined advanced technologies in order to combat modern cyber threats every minute of every hour of every day. Our 24x7x365 managed services removes the pain of your own infrastructure and operations center so that you can get back to running your business.

MESA: MANAGED ENTERPRISE SECURITY ON AWS

Right Sized and Complete

Our managed SIEM solution is built just for you. We can scale from small business to Fortune 500 enterprises. With Turnberry Solutions and our partners, we offer 24x7x365 NOC and SOC services for your platform with event monitoring, incident response and investigation, SLAs, and a custom threat feed.

Splunk Enterprise Security

MESA is powered by a leader in the 2014 Gartner Magic Quadrant for Security Information and Event Management, Splunk. The Splunk App for Enterprise Security is a modern data analytics security intelligence platform with pre-packaged dashboards, incident response workflows, and complex correlations.

Control Cost and Deliver Now

From zero to hero: Advance your security program maturity very quickly & define the path from reactive to proactive. Turnberry Solutions can deploy and integrate a managed, modern security analytics platform in weeks, not months, taking advantage of the power and flexibility of Amazon Web Services. Grow into the platform as your needs expand.

FOCUS FORWARD

Bad news: Hackers are out there. They are smart, organized, and effective. Good news: We're here too. We really want to beat the bad guys, and won't rest until we do. Outsource or Co-source your security with confidence, and get back to running your business. Contact our team today for a confidential discussion.
